

DocuVision® Lite

Inline Automated Quality Control for Océ ColorStream® Presses

DocuVision Lite, exclusively for new or existing Océ ColorStream Presses offers:

- Jet Detection
- Web Viewing
- Digital Proofs

THE BENEFIT OF AUTOMATED CONTROL

New DocuVision® Lite is a must for ongoing Print Quality Inspection via persistent jet detection, web viewing and digital proof storage. DocuVision Lite offers an easy upgrade path to full-featured DocuVision Pro for advanced data inspection, advanced print quality and full data storage and reporting. DocuVision Lite is available on the following Océ ColorStream configurations: I-Twin, L-Twin or H-Twin.

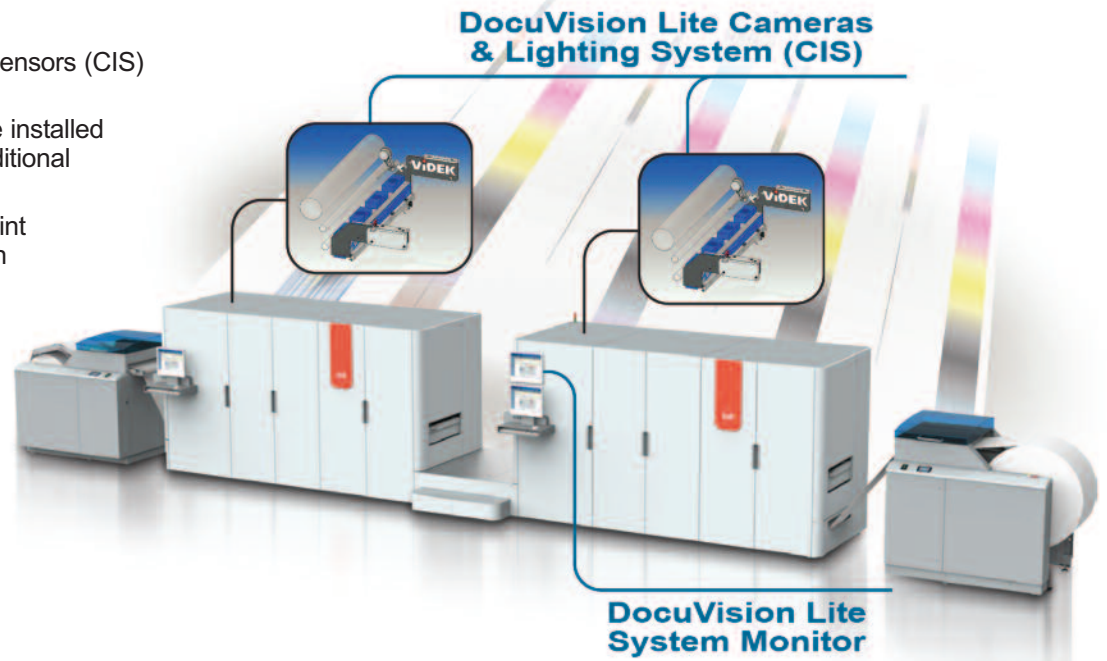

New DocuVision® Lite is an inline, full-page automated quality inspection system for the Océ ColorStream family of presses.

At full web speeds, DocuVision Lite brings immediate value by delivering 100% page-by-page Jet Detection, full Web Viewing and Digital image storage. Any detected nozzle condition will be immediately noted with an operator alert and the image stored as digital proof. Inline Quality Control helps ensure that output quality is maintained during printing, giving consistent, premium inkjet quality on all media. Automate the quality control process today with DocuVision Lite!

System Hardware

- High-Resolution Contact Image Sensors (CIS) installed in each print engine
- Vision Controller and all hardware installed within printer engine, adds no additional footprint.
- Single Monitor mounted at one print engine of choice, toggles between views of both engines
- Power requirements
120VAC, 10A

System Software: DocuVision 14.3 or higher

Jet Detection:

- Detects up to a single missing jet, media dependent
- Method: Canon Refresh Page or Canon Refresh Bars
- Error Alerts:
 - Operator message to the screen detailing inspection error(s).
 - Tri-Color Pole Light status indicator: Amber light illuminated when error detected

Operator Interface / Web Viewing:

- Touch Screen user interface with pinch-to-zoom
- Integrated Quick-Touch Help system
- Visual Warning messaging
- Image Viewing: Freeze, Pan, Zoom both sides of web from one monitor

Digital Proofs:

- Last Canon Refresh Page is stored at 300 x 247 dpi.
- Every 1/500th image of the print run is stored.
- Images will be saved locally to the DocuVision Lite controller in a folder
- Automatic file deletion: Images older than 21 days will be deleted.
